

Lawal Salim Kamaludeen

Data Engineer | Python | SQL | ETL Pipelines | Data Quality | Cloud & Analytics
LinkedIn - Salim Lawal | +31 622 96 4122 | lawal.salim.it@gmail.com | Amsterdam, Netherlands

WORK EXPERIENCE

Data Engineer Intern | Schuberg Philis, Amsterdam, Netherlands **Nov. 2025 – Jun. 2026**

- Built MetricMind; a **Python-based** data pipelines and KPI models for transforming raw engineering metrics into structured datasets for operational analysis and reporting, which aims to improve team-level decisions by around **40%**.
- Developed ingestion, validation, and transformation workflows for repository (GitHub and GitLab), and Jira data enabling unified reporting across DevOps, business, and sustainability KPIs.

Skills: Python, SQL, PostgreSQL, FastAPI, Data Pipelines, Data Validation, GitHub/GitLab API, Jira API, Docker

Data Engineer | SwanIT, Helsinki, Finland **Feb. 2025 – Jun. 2025**

- Built backend services, APIs, and data workflows for a sustainability-focused IT device platform, supporting structured analytics, reporting, and evaluation processes.
- Designed relational data models and transformation workflows for device records, sustainability indicators, and evaluation outputs, **improving device recyclability** by about **25–30%**.
- Automated end-to-end evaluation workflows, reducing manual analysis effort by **around 60%** and improving reporting turnaround for sustainability-related device assessments.

Skills: SQL, MySQL, Prisma ORM, Data Modeling, Data Transformation, REST APIs, Workflow Automation

Software Developer (Data) | File Solutions Ltd, Abuja, Nigeria **Jul. 2023 – Jul. 2024**

- Built and maintained SQL-based data pipelines processing financial and operational datasets, improving reporting accuracy across payment, revenue, and reconciliation workflows.
- Developed **10+ dashboards**, anomaly detection workflows, and revenue consolidation pipelines that improved financial visibility and contributed to a reported **40%** revenue increase, approximately **\$500K** and over **₦1 billion**.
- Contributed to payment and revenue systems supporting visas, passports, and **15+** consular services across **100+** foreign missions, strengthening consistency across multi-source operational data.

Skills: SQL, ETL, Data Reconciliation, Dashboards, Anomaly Detection, Reporting Automation, Financial Data

PROJECTS

MetricMind — LLM-based Engineering Metrics Decision-Support Platform | MSc. Thesis | [GitHub](#) **Jan. 2026 - Jun. 2026**

Technologies: Python, FastAPI, SQLite, Next.js, TypeScript, Anthropic API, GitHub/GitLab APIs, Jira API, Docker

- Built API-based ingestion pipelines from GitLab, GitHub, and Jira, normalising project data into a unified SQLite database for DevOps, business, and sustainability KPI reporting.
- Evaluated with **18 mission-critical** engineering practitioners, with **72%** reporting that the AI panel helped them identify new **cross-metric connections** without increasing cognitive load.

Flood Monitoring and Management System – FMMS - [GitHub](#) **Oct. 2024 – Jan. 2025**

Technologies: Python, PostgreSQL, Apache Kafka, Apache Flink, Docker, Time-Series Data

- Engineered a real-time streaming pipeline using Kafka and Flink, processing **150,000+** environmental sensor events **per minute** for monitoring and anomaly detection.
- Built containerized data workflows supporting time-series analytics, live monitoring, and automated alerting for flood-risk indicators.

EDUCATION

Masters of Science in Software Engineering (Erasmus Mundus Joint Masters) **Aug. 2024 – Jul. 2026**

- Vrije Universiteit Amsterdam, Netherlands** - MSc in Computer Science, **Grade (Distinction: 8.0/10)**
- Lappeenranta University of Technology, Finland** - MSc in Software Engineering, **Grade (Distinction: 4.33/5)**
- University of L'Aquila, Italy** - MSc in Computer Science, **Grade (Distinction: 27.6/30)**

SKILLS & CERTIFICATIONS

- Data Engineering:** ETL/ELT Pipelines, Data Integration, Data Transformation, Data Modelling, Data Quality, Data Integrity, Reconciliation, Data Governance, Data Catalog
- Programming:** Python, SQL, PySpark, FastAPI, REST APIs, JavaScript, TypeScript
- Data Platforms:** Databricks, Delta Lake, Snowflake, Redshift, Apache Spark, PostgreSQL, MySQL, DBT Fundamentals
- Cloud & DevOps:** Azure, AWS, Docker, Terraform, GitHub Actions, Git, CI/CD, Airflow, Dagster, Kafka
- Analytics & Modelling:** Dimensional Modelling Fundamentals, KPI Modelling, Reporting Automation, Financial Data
- Certifications:** Associate Data Engineer in Snowflake, Databricks Data Engineer Associate, Python Programmer
